

Buildings and Grounds Meeting

September 25, 2018

6:30 PM

Attendees: Bill Berger, Roger Glidewell, Heather Mausteller, Brent Crispell, Ed Sanders, Dee Davis, Cindy Jenkins

Topics—

1—Elementary playground equipment—Discussed handicap accessible equipment and rubber mulch pad for the playground with Dave Ely from Playworld. Dave shared that his company doesn't do ground surfaces. We will have to look elsewhere about the rubber mulch pad. We looked at the small structure in the courtyard. Dave said it needs a few upgrades, but is in pretty good shape for its age (20 years). The rubber pads in the vicinity are raising and we want to consider replacing a few of them. He also suggested we get it tested to make sure it is still in compliance for padding thickness. We looked at the large playground and discussed the equipment we have and what we could add for younger students and students with physical mobility issues. He shared suggestions for independent panels, ground level pieces for the exterior of the playground, etc. Dave provided us with catalogs. Dee and Ed are creating a wishlist.

Adjourned 7:45 PM
