

## Buildings and Grounds Meeting

September 4, 2018

6:35 PM

Attendees: Bill Berger, Roger Glidewell, Heather Mausteller, Brent Crispell, Eric Stair, Ed Sanders, Dee Davis, Cindy Jenkins

### Topics—

1—HS Bathroom project—Backer boards for the tile had to be redone because it was not flush or plumb and the tile was wavy. Brent spoke with Andy (architect) on Saturday (9/1) and Tuesday (9/4) about it. Andy is comfortable with the solution by the contractor (Best Quality). There is a project meeting on Wednesday (9/5) to discuss further.

2—Elementary school playground—Discussed the grade of the slope, handicap accessibility, and water/drainage. Brent scheduled a meeting with Seth Eyer for Friday (9/7) at 7:00 AM for his input into solution for the slope and drainage. The team discussed larger pipe under the stone incline, run pipe to the exchange box, and grade out the incline to the playground.

3—Elementary playground equipment—Discussed handicap accessible equipment for the playground. We are ordering a swing, bongos, and one more piece for immediate installment. Brent is calling the Playworld rep and scheduling a meeting to discuss handicap accessibility and equipment ideas, rubber mulch pad, and shade coverings.

4—Research to be completed—handicap accessibility guidelines and if there is a ratio of students to equipment

5—Multi-stack at the HS—Brent shared that some of the heat exchanges are having issues. Going to ask McClure about updates for it. Preventative maintenance was discussed and Brent shared that we do it ourselves. He shared a plan previously and it was costly so it was decided to continue doing it ourselves.

6—DMS system in ES—in some areas it is old and may need to be redone. Discussion was to redo the entire system if that is the case. We will see what options McClure offers.

Adjourned 7:40 PM

Respectfully submitted

Cynthia Jenkins
